Minutes of the M.D. Council of Lambton

The council met at Craigmyle on Saturday, November 6th, at 2 p m. All councillors were present, with the exception of coun. McNair.

Minutes of previous meeting were read and, on motion of coun. Dunfield, were adopted.

A letter was read from Edmonton advising that the Tax Sale called for the 15th of October should now be dropped, as no further extensions could be granted.

Secretary was instructed to write the mortgage companies and enquire if they would be willing to turn over their share of the crop on any lands in which they are interested in this district. which are in arrears of taxes, to be applied on tax arrears until same are fully paid.

Further correspondence was read from Canadian Bank of Commerce in connection with our application for a loan.

It was moved by the Reeve that we recommend payment of $8 00 a month direct relief to Donald Cameron, Penhold, until the end of March, 1938. Carried.

Moved by coun. Carter that the relief accounts for October be passed and that those for November be approved. Carried.

It was moved by the Reeve that coun. Dunfield be delegate to the Alberta Association of Municipal Districts' Convention at Edmonton, and that he be allowed $25 00 to cover expenses. Carried.

It was moved by the Reeve that By-Law No. 96 (authorizing the council to borrow $5,000 00 for feed and fodder), be given its three readings at this meeting. Carried unan.

By Law No. 96 having received its three readings, it was moved by coun. Carter that this By-Law be adopted as read. Carried.

It was moved by coun Cole that we lease the E.½ of 19 8 W. 20, and S.½ of section 30 33 16 4, to George Crosse for another year on the same terms and at the same rental as under his present lease. Carried.

It was agreed to lease the Conzelman farm to Alfred Kirkeby for a period of three years at an annual rental of $25 00 cash and 1 3rd share of the crop.

Coun. Cole was authorized to arrange for the hauling into the elevator of the municipality's share of the crop from the N.½ 23 33 16-4, and the S.W. 26 33 16 4.

Monthly financial statement was read.

Moved by coun. Carter that accounts as presented be passed for payment.

A letter was read from Mrs. Gostick regarding car of apples being sent to Delia for free distribution. The Reeve advised that a committee had been appointed to look after the giving out of these apples.

A letter was read to the council advising that the Dominion Government were forwarding a supply of fish, cheese, and dried beans for free distribution to residents of the district.

The following correspondence was read ;—Bureau of Relief and Public Welfare, P. G. Thompson, Hanna Hospital District, Mrs. H. E. Bickel, Unemployment Relief Commission.

Meeting adjourned.

ACCOUNTS PASSED FOR PAYMENT

Express, 22c.; Box (P.O.), $4.00; Mothers' Allowance, $16 25; M. H. Ballf, $14.75; Delia Times, $7.50; M. H. Ballf, $24 50, $11.50; Crown Lumber, $386 40; Imperial Oil, $15 56; Telephone $18 14; Insurance Premium, $14 25; Paysheets Division 6 $27.90, $50 00, $31.50; Division 3, $38.15; Division 2, $187.50, $34 50

Warning to Farmers

A copy of a letter from Vancouver received by the Edmonton division of the R.C.M.P. is quoted by request. It is as follows :—

"During the Christmas season complaints often come to hand from farmers who have forwarded consignments of turkeys, etc., to firms in this city (i e, Vancouver), in response to press advertising and mail circulars, offering exceptional prices and other inducements

"The ultimate result in many instances is that the farmer receives practically nothing.

"New firms arise and others have a change of name each year for this seasonal trade."

DELIA HOCKEY CLUB

Annual Organization Meeting

The annual meeting of the Delia Hockey and Skating Club was held in the village hall on Thursday of last week.

There was a good turnout of husky young men present when the meeting was called to order at 8.30 p.m.

L. E. Larder was elected chairman. The first business was the naming of officers and committees for the coming season. The secretary, Henry Brunner, being absent on business and unlikely to be in Delia during the near future, it became necessary to obtain a new secretary. For this post John Dmytruk was proposed, and there being no other nomination was elected by acclamation.

M. H. Ballf was nominated and agreed to act as manager for the hockey teams, and Herb Dickieson, in accepting the office of coach, said he would do his best with the co-operation of the members to turn out a good team for Delia

Committees were then formed; the first consisting of Alec Dmytruk and Clinton Larder, to act as a disciplinary committee and with power to call upon members to act as supervisors of order at the rink It should be mentioned in this connection that supervisors will report to the village council any who persist in disorderly conduct, which will result in a suspension of rink privileges An ice committee was formed with Henry Rieger as manager, the two other members being Douglas Morrison and Rev. John Sorochan.

General discussion on arrangements took place, and it was hoped to have three teams, there being, it was stated, three good forward lines available. From these a team representative of Delia would be chosen. It transpired that a communication from Hanna had been received by Kaspar Kemph regarding the formation of a district hockey league. This was left in abeyance owing to the absence of Mr. Kemph.

The question of identical sweaters for the team arose, and it was agreed that an effort to obtain these would be made. The annual ice carnival was discussed, and it appears likely this may be held before Xmas in order to avoid the severe weather usually accompanying the New Year. The weather at the turn of the year last season caused the abandonment of the carnival, and also restricted the number of games with outside teams. There was, in consequence, but three of these played last season, of which the Delia team won two.

All business being concluded, the meeting adjourned

COMMUNITY CLUB

The Community Club held its regular monthly meeting on November 12th, in the Rest Room—Mrs. Hudgeon in the chair. The meeting was opened by the singing of "O. Canada!" and the repetition of the Clubwoman's Creed

The minutes for the October meeting were read and adopted. The treasurer's report followed, and was adopted.

Business arising from the Amateur Concert and Dance held in October was then dealt with.

Arrangements were made to remember those ill in the community.

It was decided that the club meet at 2 30 p m. during the winter, beginning in December The December roll-call will be "practical suggestions for Christmas gifts"

Mrs Cook, supervisor for the meeting, gave a beautiful prose reading on "The Flanders' Poppy." and a most interesting and thought-provoking paper on "Reasons for Peace and War"

Ruth Cook gave as a most appropriate recitation, "In Flanders' Fields," by Col McCrae.

The meeting then adjourned, and delicious refreshments were served by Mrs Porter and Mrs Kary

J.R. Murray Elected Director

James R. Murray, former chairman of the Canadian Wheat Board, was elected a director of the Alberta Pacific Grain Company at the recent annual meeting of that corporation.

Craigmyle and Delia District School Fair

The following is the final list of the prize-winners of above Fair, held recently at Craigmyle :—

Class 113—Albert Chase, Vera Friedley, Jesse Battle.

Class 114—Edna Scott, Aloma Stevenson, Ruth Craig.

Class 115a—Luella Scott, Dorothy Shandera, Violet Marshall.

Class 115b—Ivan Diegel, Victor Raugust, Elmer Friedley.

Class 116—Annie Marshall, Florence Imler, Robert McCullough.

Class 117—Irma Nelner, Jean Sullivan, Billy Mossop.

Class 118—Teddy Allen, Victor Raugust, Irene Dmytruk.

Class 119—Kathleen Allen, John Paterson, Florence Imler.

Class 120—Betty Mossop, Jean Sullivan, Irma Nelner.

Class 121—Irene Brunner, Muriel Gibson, Ruth Craig.

Class 122—Jean Hunter, Helen Robson, Robert Ross.

Class 123—Ila Stoddard, Tony Nielsen, Alma Battle.

Class 124—Norma Hoffman, Maurice Rees, Alice Rees.

Class 125—Alice McKee, Winona Hampton, Alice LeVesconte.

SPECIAL PRIZES

GINGER ALE

(Calgary Brewing & Malting Co.)

Poultry, 37-43—1, Jim Scott; 2, Lorna Scott.

Manual Training, Classes 44 49—1, Ivan Diegel; 2, Algy Stevenson.

Art, High School, 108 110—1, Betty Mossop.

BOOKS FROM MOYER'S

Grade 1, 94-95, Art—1, Alice Hoy.

Grade 1, Penmanship, 111—1, Alice Hoy; 2, Joe Armstrong.

Grade 2, Penmanship, 112—1, Grace Farquharson.

Grade 2, Art, 96 97—1, Grace Wilson; 2, Dorothy Sieverding.

Grade 3, Penmanship—Albert Chase.

Grade 3, Art—1, Albert Chase; 2, George Snyder.

Grade 4, Science—1, George Snyder.

Craigmyle Board of Trade Prizes

VILLAGES

1, Alice LeVesconte, 2, Elmer Fennel.

RURAL

1, Kathleen Allen; 2, Roy Davis.

Birk's Ring, Classes 50-85, Cooking and Sewing—Alice LeVesconte.

Sack of Feeding Tankage from P. Burns & Co., Class 32—Jean Sullivan.

T. Eaton Co., Merchandise, Classes 1 12—1, Elmer Fennel, 2, Alice Rieger, 3, Kathleen Allen.

Agricultural Diploma—Craigmyle, (Grades 5, 6, 7, 8.)

Educational Diploma—Alpha.

Total Entries—1074.

Girls with highest points (Classes 1-92)—Kathleen Allen, 78; Alice LeVesconte, 69; Irma Nelner, 60.

Boys with highest points (Classes 1-92)—Roy Davis, 70; Algy Stevenson, 58; Elmer Fennel, 52.

Magic Baking Powder Special—Alice LeVesconte, Irene Brunner.

Alberta Sugar Contest—Irma Nelner (Girls), Robert McCullough (Boys).

Special Poster Prizes donated by Mr. Bell, Mr. Rubin, and Mr. Innes of Craigmyle — Margaret McCullough, Irene Brunner, Florence Imler.

Paverly a Pool Member

Fred Paverly, of Wembley, who won the spring wheat competition at the Royal Winter Fair at Toronto with a sample of Reward wheat, is a member of the Alberta Wheat Pool, having joined the Pool in 1923.

NOTICE.

Mr. C. Farstad, entomologist, will address the Delia Agricultural Improvement Association on wheat stem sawfly at Coates' Hall, on Friday, Dec. 3rd, 2 p.m.

All members are urged to attend this meeting, as valuable information will be given.

Delia Old-Timer Passes

W. C. Clark Dies From Self-Inflicted Wound

A Canadian Press dispatch from New Westminster, B C., gives news that William Cowan Clark, formerly of Delia, 65 years of age, died in hospital, Nov. 19, three hours after being admitted to the institution suffering from a bullet wound in the right temple.

Mrs. Clark told B C. police, who investigated, that she heard a shot in the bedroom of their home as she was preparing breakfast, and discovered her husband lying beside the bed. A revolver lay on the floor.

Surprise School

Surprise School activities under the new curriculum was opened for inspection to the parents and residents of the district on Wednesday, Nov 3rd, at 1:30 p.m.

The event was conducted entirely by the pupils, (Miss) Florence Imler presiding as madam chairman, and (Miss) Kathleen Allen, pianist.

The programme was opened by singing of "O, Canada!" followed by the two Junior Divisions (I and II) drawn up in semi-circular formation with their own made Indian head-dress. All pupils took their part in reciting "Hiawatha's Hunting," while the life and works of Pauline Johnson occasioned a special item.

Three tables, made and decorated and set out in appropriate style, one each for 1st, 2nd, and 3rd Divisions, representing Indian Life in miniature, with various wall pictures also corresponding, was a very well constructed project.

Pupils explained step by step, indicating with the pointer the wigwam, prairie, hills, creeks, tepees, trees, totem poles, the pipe of peace; also depicting various customs and practices of the red man of the great plains. On a map of Alberta the names of the various tribes, and the location of the five Indian reservations, were pointed out.

Division II displayed a real work of art in scrap book collections.

A winged map stand, showing the physical features in relief of the British Isles, was on display. This was the special pride of the intermediate high school, or Division III, who constructed the map. One pupil was selected for each country, explaining a vast array of information regarding important locations, trade and industry, manufacturing, the customs of the people, minerals, agriculture and fisheries.

The afternoon wound up with the National Anthem, following a delicious lunch very neatly served by the pupils and teacher, Mr. A. J. Standell, who received many well deserved compliments for the successful completion of his first enterprises of the new school year — "Indian Life and the British Isles"

Armistice Service

The annual armistice service was held in the United Church on Nov. 11th. The weather being cold there was not as large an attendance as has been seen formerly, visitors from the country being very few.

Rev John Sorochan, who conducted the service, had arranged a very fine and appropriate setting for the solemn remembrance.

Two of the three hymns sung were Kipling's "Lest we Forget," and "O, Valiant Hearts," whilst the choir contributed a special anthem, "O God of love, O King of Peace." The scripture reading and the sermon were on an equally high plane, the theme of the latter being "Learning from our heroic dead."

At the close of proceedings in the church, a procession was formed for the ceremony at the cenotaph, where a short service was held and a wreath laid at its base by the president of the local branch of the Canadian Legion, Major R F. Allen.

Craigmyle

A very successful tea in aid of the Anglican church was held on Saturday, November 13th, at the home of Mrs. A. W. Read, Craigmyle

The lady helpers were kept very busy serving tea, and attending to the various home cooking stalls, which were very well patronized.

The tables were prettily decorated, and everybody had a good time.

There were a number of guests from Hanna present, also Mrs. Gordon and daughter from Delia.

The Rev. J Evans was unfortunately unable to be present, but Mrs. Evans was amongst the guests

The sum of approximately $24 00 was raised in this way for the church.

The young people of the United church are very busy these days preparing a little playlet, which they hope to present very shortly.

Mrs. J. E. Blore Honored

CRAIGMYLE, Nov. 10th—At the home of Mrs J. Sautter a very enjoyable party was given for Mrs. J. E. Blore, who is leaving shortly for England

The afternoon was spent in games and social intercourse. A delicious lunch was served by the hostess, and enjoyed by all.

Mrs. Hazelhurst, on behalf of the ladies present, presented Mrs. Blore with a Morocco leather purse.

Mrs. Blore thanked them all for their kindness, and good wishes for a safe journey.

Those present were Mrs J. Sautter, Mrs. M. Williams, Mrs. S. Thompson, Mrs. Benson, Mrs. Farwell, Mrs. Smyrl, Mrs W. Diegel, Mrs. Tillotson, Mrs. Hawthorne, Mrs. Imler, Mrs. B. Simpson, Mrs. J. Martin, Mrs. Gordon, Mrs. A. Martin, Mrs. Allen, Mrs. Hazelhurst, Mrs. Reynold Diegel, Mrs. H. Martin, Miss Freda Sautter, Miss C. Gordon, Miss A. Thompson, Miss A. Imler.

Protect Your Hard-Earned Savings

THROUGHOUT Canada, life insurance policyholders and beneficiaries should realize the menace to their own and the national welfare that lies in extreme and unjust legislation.

These policyholders represent 50 per cent. of the electors—federal and provincial. Through the institution of life insurance, they have so pooled their resources that their collective interest can withstand attacks that would bring financial disaster to the individual.

Despite war, epidemic, panic and depression, life insurance has met every policy obligation promptly and in full.

Despite the financial disturbance of the past six years, it has distributed, and continues to distribute, to its policyholders and beneficiaries, over $500,000 every working day.

Seventy-five per cent. of this money has been, and continues to be, paid to living policyholders; the balance to beneficiaries.

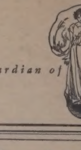

Life insurance is the greatest co-operative business in Canada. No one doubts its strength and stability. No one questions the prudent and intelligent direction of its affairs.

It is the guardian of the hard-earned savings of 3,500,000 men and women in all walks of life.

Today there are forces in Canada that menace the welfare of these people. These forces would penalize their savings and impair their investments through legislation which cancels public and private debts—regardless of the debtor's ability to pay—and which tends to destroy the ownership of public and private property.

The interests of life insurance policyholders and beneficiaries—as of all other citizens whose savings are invested in one form or another in Canada—demand that promises to pay be observed, when the debtor is able to pay; that hard-earned savings which safeguard the homes and families of the Dominion be protected from unjust legislation.

The Big Interests

One is sometimes tempted to wonder why those so-called old fashioned virtues—thrift, hard work, prudence and integrity, are so frequently sneered at nowadays and discounted as something that is out-moded and therefore, if not actually to be abhorred, at least something to be ashamed of.

Despite the fact that history, and particularly comparatively recent history, abounds with the names of men who from little or nothing have built up great industries, have risen to wealth or power, by the application of these virtues, plus ability and foresight, it would appear as if they were to be condemned, and the capitalistic "system" which in combination with a democratic form of government gives the poor boy an opportunity to rise from the ranks ought to be relegated to the ash heap, if some proponents of upheaval are to be believed.

Without holding any particular brief for capitalism and the capitalists one cannot help but deplore a good deal of the loose talk which is indulged in, all too frequently, in which the capitalist is held up as the foe of the common man and such terms as "the big interests" and the "fifty big shots" are used to express contempt, if not hatred, for those who have got along in a competitive world by their own efforts; and in which such slogans (not borne out by statistics in the United States and Canada) "the rich are becoming richer and the poor are becoming poorer," pass for currency and are accepted by some as gospel.

It would almost seem as if some of the facts are forgotten; that, for instance, without capital labor could achieve nothing of consequence; that the co-operative efforts of capital and labor have made the luxuries of yesterday the necessities of to-day and that inevitably the luxuries of to-day will become the necessities of tomorrow and that nowhere in the world have these achievements approached the zenith as they have in the countries of this continent where free rein has been given to individual effort under a democratic, capital-labor system to an extent as yet unrealized elsewhere in actual practice.

* * * *

Citing a number of illustrations of men who have risen to important posts in industry J. Lambert Payne writing in the Ottawa Journal refers, among many others, to Walter P. Chrysler, whose story is an extraordinary tribute to these old fashioned virtues, and the late John R. Booth, of Ottawa, and goes on to say:

"Instead of wealth being in the hands of a predatory few, as is often alleged, its diffusion is the salient fact of our time. As a matter of totality in Canada, it is literally in the hands of millions. . . . There is not a trace of cohesion or co-operation among the capitalists (referring to allegations that the big interests combine to thwart the will of the people). Chrysler and Booth had to meet strenuous rivalry at every step in their progress; and for that reason, so patent to the judicial mind, we use a misleading word when speak of capitalism as 'a system'.

"Moreover," as Mr. Payne points out, "the execration of capitalism in certain quarters ignores the fact that it has existed since organized society began, and," he concludes, "will likely persist. Commerce is impossible without it."

And not in industry alone has capital, so far in the history of the world, been one of the two essential factors to civilized progress, but it is also an important element in agriculture. Every farmer is himself an illustration of the co-operative effect of capital and labor, for every farmer is both a capitalist and a laborer. Every man who purchases a half section of land and a line of implements and power to operate them becomes a capitalist and when, in addition to that, he hires a man to operate some of his machinery he places himself in the category of a capitalist employer of labor.

And every farmer who has employed one or more men knows that there must be co-operation and accord between himself and his hired man if both, or either, are to attain maximum results.

* * * *

It has often been said that there is nothing new under the sun and that is true of efforts to decry capitalists and capitalism. The same cry has been raised during every depression which has struck industry on the North American continent as was aptly pointed out, with examples, in a recent issue of a popular magazine.

If past history is to be regarded as a guide, it is probably fairly safe to assume that with the return of prosperity, the baiting of what is regarded as "the big interests" will disappear as people become more occupied with efforts to advance their own interests, provided that while they are doing so they are not unmindful of their obligations to others.

In the agricultural west which has been so hard hit recently and in those sections which are still facing the dire results of prolonged drought, the disappearance of ire at capital may be retarded, but the time will in all probability come when the rank and file will look back in retrospect and wonder what it was all about.

Statue Of Christ

Erected On Barren Rocky Eminence On Bering Sea

A life-size statue of Christ faces Russia across the Bering sea from the highest point of land on lonely Christ the King Island, erected by the island's population of 190 Roman Catholic Eskimos as a symbol of Christ's love.

Details of the statue and its dedication were revealed in New York by Miss Felicity Buranelli, niece of the late Mrs. Samuel J. Kitson, widow of the famous British sculptor. Mrs. Kitson, before she died seven months ago, completed the statue her husband started.

Father Bernard R. Hubbard, the "glacier priest", scientist and explorer is responsible for the erection of the statue on the barren rocky eminence rising 900 feet above sea level, 85 miles from Nome.

There are 70,000 public houses in England, of which 28,000 have been rebuilt or modernized since 1935.

One elephant examined in a survey was found to have a heart that beat only 22 times per minute.

A mixture of water and powdered oyster shells is used as house paint in China.

An Ultra-Modern School

Opened Recently At Ilford, England, And Accommodates 1,000 Pupils

A new school with the impressive lines of an ultra-modern factory has just been opened in Ilford, England, with accommodation for 1,000 children between 5 and 11.

It is the Torbitt Elementary school and it took a year to build and cost nearly $200,000.

The school has two halls, a film-projection room and wireless equipment to accommodate a loud-speaker in each room. There is a tiny tots' department, complete with rocking horse, helter-skelter and fairy cycle.

A special subway is being built to enable children to pass safely from the south to the north side of the arterial road. The subway will admit directly into the school grounds. Ramps have been provided instead of steps to facilitate the passage of perambulators.

All the class masters in the school are university graduates.

The Successful Farmer

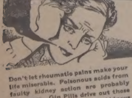

It Takes Brains And Intelligence To Win Success

The idea that "any fool can farm" —successfully—is in some minds, but it is a tragic myth. The man or woman who hopes to make a success of life in the country districts and on the land must have a greater diversity of knowledge than the person who makes a success of his or her affairs in urban communities. Indeed, the person who knows little or nothing about land activities is astonished to discover how resourceful even farm children are and the multitude of things they can do before they are well into their teens.

Certainly, if we are to have an expansion of successful farming in this province, the old idea that "any fool can farm" must be driven from the minds of some in official circles.—Halifax Herald.

The organic theory as to the origin of oil is that petroleum is decayed prehistoric plant and animal matter.

RHEUMATIC PAINS are TORTURE!

Don't let rheumatic pains make your life miserable. Poisonous acids from faulty kidney action are probably the cause. Gin Pills drive out these poisons by toning up the kidneys so they can filter the blood properly. "Prove their merit through their use!"

GIN PILLS FOR THE KIDNEYS

Two Cathedrals

Anglican And Catholic Buildings In Liverpool To Cost Millions

On the same ridge overlooking the city of Liverpool, two vast cathedrals are being built. Of the Anglican cathedral, choir and transepts are already complete and 220 men are at work building the tower. Of the Roman Catholic cathedral only the crypt is visible, and the superstructure will not begin to arise for another two years, but the first Mass has recently been celebrated in one of the crypt chapels. To build the eastern section may taken 15 years. The entire building, which will cover five acres, may not be completed within a century.

The Anglican cathedral, begun in 1904, should be finished within the next 20 years. It will have cost about £2,000 000. More than a million has been spent already. The central section, on which work is now being carried on, will cost £350,000, of which all but £52,000 has been subscribed.

The cost of building the Roman Catholic cathedral is estimated at £3,000,000. It will be the biggest cathedral in the world, and the diameter of its dome will measure 168 feet.

The architect of the Anglican cathedral, Sir Giles Scott, is a Roman Catholic; that of the Roman Catholic cathedral, Sir Edwin Lutyens, is a Protestant.

The style of the Anglican cathedral is modern Gothic and the material is red sandstone; that of the Roman Catholic cathedral is described by the architect as "Wrenissance," and the material is brick. Wrenissance is a "portmanteau" word, including both Renaissance and Wren, the famous architect who designed St. Paul's Cathedral.—Coming Events, London.

Housing Loans

Aggregate Amount Of Loans Up To Oct. 31 Total Sum Of $111,898,303

Since inauguration of the Dominion Housing Act in July, 1935, a total of 1,940 housing loans, representing 2,761 family units, have been made, aggregating $11,898,303, up to Oct. 31 last. This does not include the home improvement plan, under which 28,275 loans, aggregating $11,001,817, had been made up to the end of October.

The number of housing loans, which in all provinces except Ontario and Quebec, corerspond closely to the number of family units provided, together with the aggregate for such loans for each province, are as follows:

Manitoba, 42 loans, $266,514; Saskatchewan, two, $8,200; Alberta, nil; Ontario, 885, $5,154,292; Quebec, 485, $4,200,829; Nova Scotia, 243, $1,070,778; British Columbia, 215, $887,989; New Brunswick, 58, $225,667; Prince Edward Island, 10, $54,034.

Compared with Oct., 1936, the loans made show an increase of more than 250 per cent. in amount and number of dwelling units provided.

No Harm Resulted

Woman Worried Over Breakfast She Gave Her Husband

Stanley Ditzel, switchboard operator in the Town Hall at West Orange, New Jersey, received a call from an excited woman who asked for the Board of Health.

"The line is busy, madam," said Mr. Ditzel.

"Oh, you help me, please," she pleaded. "After my husband left for work this morning, I discovered I made a terrible mistake. I gave our dog chopped meat, which I was going to make into patties for my husband's breakfast, and gave my husband patties made of canned dog food. What shall I do?"

A dog owner himself, Mr. Ditzel assured her no harm would result. Relieved, she explained that neither her husband nor the dog seemed to be any the worse for the error, although she had been worried. She did not give her name.

London's Passenger Trains

Over 7,000 Arrive And Leave Terminals Every Day

The British Railways Press Office announces that over 7,000 passenger trains arrive and leave London's seven main line terminals every day, an average of five trains a minute. There are in Britain nearly twice as many passenger and freight trains for every mile of track as there are in France, and more than five times as many as there are in the United States.—Port Arthur News-Chronicle.

Farm Machinery Imports

The Dominion Bureau of Statistics reported Canada's September imports of farm implements and machinery was worth $1,738,849, a large increase over the $800,522 worth in September, 1936. During the first six months of the present fiscal year imports were valued at $10,799,275 against $6,081,160 in the same period the previous fiscal year.

Claimed to be the largest in the world, a pearl nine inches long by 5½ wide has been found in a giant clam in the Philippine Islands. Of scientific interest, it is not of a commercial type.

A small jointed animal, related to the fresh water shrimp, is parasitic on the skin of whales and is known as the whale louse.

Novelist Has Recipes Used By Famous Italian Poisoners

There is a bank in London which has in its vaults secret recipes of all the deadly poisons known to the Borgias, the famous Italian poisoners.

They have been placed there for safety by a woman who is afraid they may get into the hands of the wrong people.

She is Miss Kitty Shannon, novelist daughter of the late Sir James Shannon, the famous R.A.

When she decided to write her sixth novel—about the Borgias—Miss Shannon went to Italy to hunt up the poisons they used for inclusion in the book.

Miss Shannon told the Daily Sketch: "I advertised in a Rome paper for somebody who knew the recipes.

"The first thing that happened was that I had a visit from police officials, but I was able to reassure them that I had no evil intentions.

"Then I had a visit from a chemist; in fact, one of his ancestors had prepared poisons for the Borgias. He gave me the recipes for ten different poisons.

"I was appalled by the simplicity of some of them. One, which I dare not reveal, is so simple that it can be prepared from boiling down three different weeds that you tread underfoot any time you go for a country walk. One drop of it will kill you in about fifteen minutes.

"And now there is a little difficulty over my book. The poison recipes were to have been included in it; but the publishers are also nervous.

"So some of the Borgia poisons will have to remain secret. They will stay at the bank until I destroy them. They are too big a responsibility."

When The King Intervenes

Young Officers In Royal Service Are Often Helped

Every commission in any of the three fighting services requires the Royal signature. To facilitate this task, in itself no light one, each commission has, attached to the edge of the paper opposite where the King signs, a little strip of blotting paper. After signing his autograph, the King bends back this attachment and the signature is dried without further trouble.

Like his father, the King interests himself personally in all recipients of his commission. All court martial judgments, before promulgation, are submitted to him, and often enough King George V. would intervene. Where a young officer, perhaps, had got into money troubles, and cashiering was recommended, he would on occasion point out that the trouble arose through the youngster joining an expensive regiment, and suggest, instead of cashiering, transference to a less exacting unit.

At least one brigadier-general on the army list to-day owes his military career to such intervention by King George V.—Buffalo Courier-Express.

An Unwelcome Visitor

Mitten Crab From Asia Has Been Seen In England

Appearance of the mitten crab near Chelsea, England, has aroused fears that the Thames is in danger of a Far East invasion. Experts are wondering if it is the first of an army which appeared on the coasts of Europe 20 years ago. The mitten crab is a native of Asia, and its presence in European waters is unwelcome because the tunnels it makes undermine river banks.

Instructor: "You say in this paper that you know the connecting link between the animal and vegetable kingdoms. What is it?"

Student: "Stew."

Contributions have so greatly exceeded payments during the last year that the British Unemployment Insurance Fund has a surplus of $250,000,000.

Westminster is London's most dangerous borough, according to statistics of road accidents, while Stoke Newington is the safest.

The sawfly builds its cocoon with a lid, through which it may escape.

IMPORTED YARNS

Woolcraft of Regina are mill agent importers and stockists of Sirdar Knitting Yarn, Blanck Bros. French Tapestry Supplies, Pearsall Petit Point Silks and Gauze, etc., English Glove Leather, Weldon Tapestry and American Knitting Publications, A. Morrall Knitting Needles. Free samples and nearest supply house on request. Trade enquiries solicited.

WOOLCRAFT - - REGINA

Most Important Person

Is One Who Contacts The Customer In Business

Who's the most important person in your company? President? Sales manager? Personnel manager? No, on all three, according to John R. Tunis, well known American author.

The most important person in every outfit, he writes, is the man or girl who has customer contact.

"If you have contact with the public by letter, telephone, wire, or word of mouth," he urges, "you represent your company. If you happen to be the first person to reach the public, you are the most important cog in the organization. From you the stranger gets his impression of the compnay, an impression that stays in his mind forever. Two minutes have secured lifelong customers, and they have made lifelong enemies.

"What sort of person do you care to do business with, the man who growls into the telephone: 'Gimmemistersmithenifheisnttheregimmemisterhogan', or the pleasant voice which responds, 'Good morning, this is the Riverside Hotel' "

"Courtesy not only gets business, it holds business," continues Mr. Tunis. "Ten years of sound business dealings have been spoiled by ten seconds of discourtesy. A corporation executive checked and discovered that his company was spending over half a million dollars each year to get new business, but almost nothing outside regular channels to hold the business it had. He decided to spend $5,000 on an adjuster, a man who spent his whole time on clients and former clients, ironing out disputes, seeking causes of loss of business, and finding out whether the company's service was satisfactory. In one year the number of customers dropping from this concern's books declined 62 per cent.

"What a difference it would make if all corporations acted on a policy of courtesy. What a difference if the honest businessmen of the nation paid as much attention to courtesy as the gyps, crooks, fly-by-night promoters, and scalawags who have only one stock in trade—a courteous address and manner. What a difference if business became polite and stayed polite, not only to the public but to itself. In short, what a difference if we all took the curt out of courtesy."—Rotarian Magazine.

Praises B.C. Poet

London Times Pays Tribute To Audrey Alexandra Brown

"The Tree of Resurrection" poems by Audrey Alexandra Brown, native of British Columbia, is the subject of an appreciative notice in the Times Literary Supplement. The verses are "untouched by any contemporary fashion," says the reviewer who goes on:

"Her verse is remarkable for its melodious richness and rhythmical ease. Nor is its magic merely verbal or 'escapist'. She can express the eerie, too, very hauntingly in such poems as 'White Bride' or 'The Wendigo'. But she is at her best when she is bringing the past to life in 'The Roman Sentry at Pompeii,' for example, or 'The Tree of Resurrection' or evoking some moment when the hard outlines of actually are dissolved."

Remarkable For Restraint

Anthony Eden Does Not Inherit Father's Fiery Temperament

The father of Anthony Eden was said to have been a rip-snorting fire-eating man with a temperament he never tried to control. The son seems remarkable for his restraint and control, and has shown it all through his work. He never met more provocation than in his first meeting with Mussolini, who resented the United Kingdom sending so young a man to talk to Caesar's successor. Eden is said to have held his ground with dignity, but Il Duce has never liked him since. It is not the first time the very destiny of nations might seem to depend upon very small things.—St. Catharines Standard.

Well Qualified

"So," said the old general, "you think you would make a good valet for an old wreck like me, do you? I have a glass eye, a wooden leg, and a wax arm that need looking after, not to mention false teeth and so forth."

"Oh, that's all right, sir," replied the applicant, enthusiastically; "I've had lots of experience. I worked for six years in the assembling department of a motor car factory."

A Cash Transaction

Mrs. Inglis-Jones, tall, fair American, who buys for New York shops and lives in Regent's Park, London, is telling this story against herself. She was buying partridges in a West End poulterer's. When the shop assistant said "Trussed, madam?" she replied, "No, I will pay now."

To protect peasants against high prices of unscrupulous middlemen the Hungary government has instituted the practice of posting egg prices daily in the nation's post-offices.

The British general post office delivers 20,000,000 letters daily, in addition to parcels.

A man is only as big as the things that make him angry.

Filing Of Fingerprints

Urges Voluntary Filing By The General Public

Voluntary filing of fingerprints by the general public with police should be encouraged, report of the Royal Canadian Mounted Police, recently printed, states. Many instances of the value of fingerprints for identification purposes, apart from criminal investigations, have come to light.

"It is certain that at least the travelling public (and who is not a traveller) should be encouraged to file their prints with us for use in case of misfortune," wrote Inspector W. W. Watson, of the fingerprint section.

"During the year we identified two unfortunates simply because of their past criminal records. In one instance we were able to satisfy an insurance company, thus promptly benefiting the beneficiary.

"Only recently a gentleman of periodic loss of memory condition filed his impressions with us. Possibly much worry would have been saved in numerous other instances if imprints of certain individuals were available for comparison purposes."

The two "unfortunates" referred to were men found dead on railway tracks. One, found at St. Boniface, Man., was identified as Steve Kozicki, whose prints were on record because he had been convicted in Port Arthur for assault. The immigration department had further particulars about the man which enabled steps to be taken to notify relatives in Poland.

The other man was found at Belleville, Ont., and his prints were on file because of some offence. He was found to have been a former resident of Ottawa and his father identified a photograph which was also on file. There was some insurance on his life and his relatives were able to obtain payment.

As usual the fingerprint records of the force were useful in many cases of crime, assisting in the tracing of the records of persons arrested and in directing police to the offenders.

One man was arrested although he took the precaution to wear gloves. A tear on one of the gloves was his undoing. He was Thomas L. Madill and the offence was breaking into a service station at Lindsay, Ont.

Bar Canadian Nurses

American Officials To Take Steps To Prevent Their Entry To U.S.

James Houghteling, United States immigration commissioner, in a letter made public by the National Nurses' Association, said immediate steps would be taken to prevent the further entry of job-seeking Canadian nurses into the United States.

The association recently protested to Labor Secretary Perkins against what it called the "wholesale 'importation' of Canadian nurses" to hospitals in New York state and elsewhere "to the detriment of qualified graduate American nurses in New York and the entire United States."

The protest was referred to Houghteling, who replied:

"I have been examining the records and am inclined to agree with you that the courtesy we have been extending to this class of Canadian visitor has been overdone. * * *

"I am therefore issuing instructions to our officers on the Canadian border that while Canadian nurses made be admitted on visitors' permits for ordinary visits on cases which require temporary entry into the United States, visitors' permits shall no longer be issued for the purpose of enabling Canadian nurses to come into this country to take jobs here."

Among the new delicacies exhibited at the annual food and better housekeeping show in Chicago were duck eggs baked in mud, shredded bird nests, shark fin and pickled eel.

AT 83 SHE DEFIES RHEUMATISM

After Suffering Acute Pain For Years

Rheumatism first attacked this old lady in 1931, and gradually spread from her arms to other parts of her body. Then she started to take Kruschen Salts, and now she sends the following letter in her own handwriting:—

"I have suffered from rheumatism since 1931. At first, I felt acute pain in both arms. I could not sleep for pain. It grew worse, and gradually crept down to the tips of my fingers. Next it reached my knees and ankles, which made me quite helpless for a long period. A friend recommended me to take Kruschen Salts. I find they do me more good than any other medicine, liniment or ointment I ever used. This is my own writing, though I am in my 84th year."—(Mrs.) H.

The pains and stiffness of rheumatism are often caused by deposits of needle-pointed uric acid crystals in the muscles and joints. Kruschen Salts stimulate your liver and kidneys to healthy, regular action, and assist them to get rid of the excess uric acid which is frequently the cause of your suffering.

The Word Hydro

Means Something Apart From Electric Power In Britain

In Canada, the word "Hydro" usually refers to one of the country's most vital assets, hydro-electric power. It's a different story in Britain, where the people always think of a hotel when "Hydro" is mentioned. The term is short for "Hydropathic". English and Scottish Hydros are usually temperance hotels where water cures are the thing.

Canadians learned something about them during the visit of 22 Scottish hotelkeepers and their wives. The party, organized under the joint auspices of the Scottish Travel Association and the Hotels and Restauranters' Association of Great Britain, spent a day at Ottawa, seeing the Parliament Buildings and other aspects of the capital and making a thorough inspection tour of The Chateau Laurier, where they were entertained to dinner by the Canadian National Railways hotel department.

Two Hydros were represented in the group—one at Peebles and the other at Skelmorlie. Hotel names in the list that seemed particularly romantic to Canadian ears were the Ugadale Arms of Machrihanish, the Duke of Gordon Hotel of Kingussie, and the Bailie Nicol Jarvie of Aberfoyle. The last is named after a popular Walter Scott character, the magistrate in "Rob Roy."—C.N.R. News Bulletin.

Leaves Post

Aide-de-Camp To Lord Tweedsmuir To Rejoin Royal Navy

Lieutenant S. G. Rivers-Smith has relinquished his post as aide-de-camp to the governor-general and left for England to rejoin the royal navy, which he left for service with Lord Tweedsmuir.

Rivers-Smith chose to leave his post at Ottawa one year before his term expired, feeling he would lose contact with developments in the navy if he remained longer.

Last summer Rivers-Smith accompanied the governor-general on the complete itinerary of his tour through the northwest and British Columbia. He was the only member of Lord Tweedsmuir's staff who covered the whole journey of more than 10,000 miles.

His successor is Lieut. R. Scott, also of the royal navy.

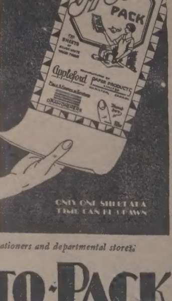

Only 16 countries in the world have kings to-day. This excludes czars, dictators, emirs, emperors, princes, queens, etc.

In Russia you must agree that the millennium has arrived or say good morning to a firing squad.

A REVOLUTION IN THE KITCHEN

Presto-Pack is a new and revolutionary way of handling Household Waxed Tissue. 45 sheets packed in an envelope which you hang on the wall. Then as you require it, just draw out *a sheet at a time*. You can't draw more. That's the beauty of it.

Try Presto-Pack today. You'll find it the handiest thing in the kitchen.

At grocers, druggists, stationers and departmental stores.

PRESTO-PACK

Warehouses at Calgary, Regina and Winnipeg

WAKE UP LIKE A CAVE MAN

Feel Full of Life—No More Tired, Dull, Heavy Mornings

Keep your liver healthy and you'll feel great every morning. When you wake up feeling "rotten" your liver is out of order. Your liver clears the blood of poisons, separates the nourishing part of your food from the waste. Supplies energy to muscles, tissues and glands—gives out bile, the body's laxative, helps stomach, kidneys and intestines to work properly. A mere bowel movement isn't enough. "Fruit-a-tives" made from fruits and herbs, will strengthen and build up your liver like nothing else will. You'll be amazed how well you are every morning. Try Fruit-a-tives. All druggists.

FRUIT-A-TIVES LIVER TABLETS

The King's Prayer

Was Different At This Year's Opening Of Parliament

At the end of his speech from the throne opening his first Parliament, King George VI. said:

"I pray that under the blessings of Almighty God, the outcome of your deliberations may advance the peace and well-being of my people and the peace of the world."

That is more than a British king usually says in invoking a divine blessing on the deliberations of Parliament. Ordinarily the monarch asks that God may bless the "labors" of Parliament. There is ample reason for the more specific prayer which concluded this year's speech from the throne.

True, in the speech which preceded the prayer, the king said: "My relations with foreign powers continue to be friendly"; and he cited his ministers' efforts to restore peace in Spain and in the Far East. But there was another and more ominous passage in the speech:

"My ministers are anxious that energetic steps be taken to complete measures for the protection of the civilian population against air raids. A bill to put the necessary arrangements on a statutory basis will be brought forward for your consideration."

In a country whose "relations with foreign powers continue to be friendly," in a country which is employing all the resources of diplomacy to prevent either of two localized wars from spreading into world conflagration, it is necessary to take "energetic steps" to protect men, women and children from sudden death rained from the skies by the bombing planes of one or more of the powers now described as "friendly."

That fact adds to solemnity of the king's prayer that Parliament's deliberations may "advance the peace and well-being of my people and the peace of the world."—Buffalo Courier-Express.

Trainer For Blind Flying

First One Made In Canada Shipped To British Air Ministry

The first "trainer" for blind flying instruction ever built in Canada has been shipped from the Gananoque, Ont., plant to the British Air Ministry. It is the first of a large order.

The machine is for indoor instruction, and is electrically controlled. It banks, dives and turns and goes through all the normal movements of a regular plane—except actual flying. It has a 12-foot wing span.

When in use the cockpit entirely covers the student, and he has to "navigate" with his instruments and the radio only. Air is forced against the machine by a series of bellows. Standard instrument dials are used, and they are regulated so that a given movement of the controls brings about the corresponding change in instrument readings that would occur in actual flight.

Rough-air conditions are simulated by an automatic device for creating "bumps" that can be turned on and off at the will of the instructor. Two-way communication between student and instructor is by phone or radio. The equipment includes a device known as the automatic course recorder, which moves along the instructor's desk and records on a map or chart the actual course flown by the pilot in his trainer.

The inventor of the marhine is E. A. Link. These trainers are being used by the Govenrments of nearly a dozen countries, he said.

Man Resists Camera

Objected To Being Photographed And Plate Showed Only Spots

When John Bernard of Wherski, Moravia, was arrested for vagrancy in Prague, Czechoslovakia, he told the police that to photograph him for identification purposes would be a waste of time because he would "resist the process," though quietly facing the camera. John was right. The police took the photograph, but when the plate was developed only a few black spots appeared on it.

31

Real relief . . . quickly!

MINARD'S "KING OF PAIN" LINIMENT

To Slaughter 2,000 Buffalo

Will Prepare Selected Animals At Wainwright Park For Market

Preparations are now being made for the slaughter of 2,000 surplus animals of the Canadian Government's great buffalo herds at Buffalo National Park, Wainwright, Alberta. Made necessary by the annual increase registered by the buffalo, the slaughter is carried out under the direct supervision of a government inspector and strictly up-to-date methods are employed in preparing the selected animals for market.

As a result of the annual reductions to Canada's buffalo herds, high quality buffalo skins suitable for the manufacture of coats, motor robes, floor rugs, and other articles are again on the market at the lowest prices in fifty years. These skins may be purchased from leading furriers or in quantity lots from the National Parks Bureau, Department of Mines and Resources, Ottawa, Canada. Thanks to improved furdressing methods and the fact that these animals are slaughtered only when the fur is prime, the buffalo products of to-day are considered superior to those of years gone by when a pair of buffalo robes were believed necessary for a complete winter driving turnout. The careful dressing of the green hides has resulted in a skin that is very pliable and light in weight, and which, after tanning, may be tailored into excellent outdoor garments. Experiments in shearing the long hair from dressed skins have produced fur resembling plucked beaver in appearance.

Canada's success in saving the buffalo from extinction has been heralded as one of the outstanding achievements in the history of wild life conservation. Over sixty years ago the buffalo inhabited the western plains of Canada and the United States in countless thousands, but the advance of civilization and the improvidence of hunters brought about one of the greatest slaughters in wild life history, all but wiping out of existence this most interesting species. In 1907 the Government of Canada purchased a herd of 716 pure-bred buffalo, of which 631 were placed in Buffalo National Park and the balance in Elk Island National Park. The growth of the herds was rapid and it soon became necessary to take various measures to reduce their numbers. During the four-year period 1925 to 1928 a total of 6,673 buffalo were shipped to Wood Buffalo Park near Fort Smith in the Northwest Territories to relieve crowding at Buffalo National Park. Periodic reductions have also been carried out from time to time by supervised slaughter.

Honey Industry Growing

Alberta Beekeepers Association Now Has About 1,500 Members

Twenty-five years ago a few bees were imported into Alberta by an enthusiastic farmer and to-day the Alberta Beekeepers Association which recently held its fourth annual meeting at Calgary boasts of a membership approximately 1,500. The output placed on the market last year was 1,850,000 pounds, and the value at wholesale price about $129,500.

"Beekeeping is confined primarily to the irrigation areas at present," said S. C. Hillerud, provincial apiarist, "but in the large stretch of territory north and west of Red Deer and north of Edmonton there is an undeveloped field, from the standpoint of the industry, offering a potential output of many million more pounds each year."

Seeking severe punishment for persons who molest bee hives, officials of the Association have, during the past year, been successful in obtaining convictions under federal regulations of from 60 to 90 days' imprisonment. "Parties who invade fields where many hives are located are 'quite a problem'," said R. L. Hawthorne, of Taber, president of the association. It is not so much the loss of honey, as the resultant damage, that worries apiarists however.

He also indicated that a determined effort is being made to have federal legislation enacted to standardize honey containers in all the provinces and also to institute more rigid inspection and grading of all inter-provincial shipments to secure better quality.

At the present time Mr. Hawthorne's report stated, Alberta honey is being produced in such quantity as to about balance domestic consumption. Soon there will be export business and markets to be considered. With that in mind a more favorable freight rate for the product from Alberta to seaports has been asked, and definite assurance received that it will be given every consideration.

R. H. Hawthorne was elected president of the Association. C. Elmer Morgan of Brooks, is vice-president and S. O. Hillerud of Edmonton, secretary-treasurer.

A completely streamlined automobile is said to require approximately half as much power to drive it forward as the common type automobile.

Through the introduction of colored matter into their food, silkworms now spin threads of various hues.

No matter how many quills a porcupine loses in battle, he never is found unarmed. 2229

A Picturesque Highway

Banff-To-Jasper Road Is Masterpiece Of Engineer's Skill

If work keeps on at the present pace, one of the most magnificent mountain areas in all the world will be thrown open to the motoring public in 1939. A hundred miles of highway, 4,600 feet high, the Banff-to-Jasper highway, in the Canadian Rockies, is a masterpiece of the highway engineer's skill.

Winding through storied country—where marks of early Canadian explorers are still to be found—the new highway takes the traveller through icefields the like of which are to be found nowhere else on the continent, if in the world. More glaciers are to be seen in ten miles here than in a month's motoring elsewhere in Rocky Mountain parks.

Connecting Banff National Park, starting from Lake Louise Station, with Jasper Park in the north, the highway was started by relief labor, but since 1934 has been operated as a standard Government road project.

Gradually, sections of the highway, being built by two crews, one operating from the north and the other from the south, are being thrown open to the public. This year the tourist was able to travel 38 miles of the new highway from the Lake Louise end.

Nineteen miles of new road were built by the Lake Louise crew this summer, including one of the road's biggest jobs, the bridge across the North Saskatchewan River, near the halfway mark.

A Striking Likeness

Late King George V. Strongly Resembled Russian Tsar

In his introduction to the correspondence between the Tsar Nicholas II. and his mother, Sir Bernard Pares referred to the striking likeness between the Tsar and King George V.

This was so great that even the Dowager Empress Maria Fedorovna said that she had almost mistaken the one for the other.

The resemblance is illustrated by a story which has not, I believe, been published before.

In 1920 King George placed Frogmore Cottage at the disposal of the Grand Duchess Xenia, the Tsar's elder sister. When the Grand Duchess went to live there she took with her one or two Russian servants.

Soon after her arrival King George went over from Windsor Castle to visit his cousin. It was a cold day, and he wore a heavy overcoat.

The door was opened by one of the Russian servants, who had never seen King George before. As soon as he saw the visitor the man fell down on his knees and kissed the hem of the King's overcoat. He was convinced that it was the Tsar who stood before him. — London Daily Telegraph.

The Newest Discovery

Radio Receiving Idea Would Not Appeal To Many

Professor E. G. Boring, director of the Harvard psychological laboratory in Cambridge, Mass., said S. Smith Stevens, a psychology instructor, could receive radio programs by filling one ear with salt water, inserting a piece of wire into the water and strapping a second piece of wire to another part of his body.

Stevens is specializing in sensitivity of the human ear and its powers of generating electricity. Professor Boring said Stevens could receive musical programs but could not distinguish announcements.

Boring explained that energy carried into the ear by the wires caused hairs in the inner ear to vibrate.

For Tall Sailors

Royal Navy Will Supply Them With Longer Hammocks

Tall British sailors who find the hammocks on His Majesty's warships too short to accommodate them may apply for longer ones.

Orders issued by the Admiralty said that small stocks of longer hammocks are now available for issue on demand.

The new hammocks will be restricted to the quantities required by men of exceptional height who cannot be satisfactorily accommodated in hammocks of a standard pattern.

Link With Outside World

Lonely farmers in the small villages of the Outer and Inner Hebrides are to have a modern radio telephone service for the first time. It will connect them with Inverness, Scotland, on the mainland. Many villages which have never been in direct connection with the outside world will be benefited.

World's Fastest Motorship

The Prins Albert, the newest cross-channel packet of the Belgian State Railways, has made her maiden voyage. The fastest motorship in the world, she reached 25½ knots on her trials. The ship is also notable for the fact that noise and vibration have been made imperceptible in the passengers' quarters.

Bakers of Hamelin, Germany, made their pastries in the shape of rats during 1935, when the town celebrated the 650th anniversary of the legendary Pied Piper.

In Greater London alone, nearly 100,000 boys and girls become available for work every year.

Energy From The Sun

Carry On Experiments To Make Food And Fuel From Sunlight

A new clue to the miracle of harnessing the energy of the sun, promising man a chance to make his food and fuel almost directly from sunlight, was announced to the American Institute of Physics' symposium of biophysics.

The clue is discovery of a dual nature in chlorophyll, the green coloring matter in plants. The green stuff is used by plant leaves to manufacture starch and sugar from sunlight and from the carbon dioxide and water in the air. It is the source of all food.

Famous laboratories for several years have been extracting the chlorophyll from plants and trying, in test tubes, to find a way to use it for direct, artificial manufacture of food from sunlight. The experiments have never quite reached success.

Explanation of this failure is the discovery reported by the Kettering foundation, Antioch college, Yellow Springs, Ohio, that the green stuff, which scientists have been extracting, is not the same as the chlorophyll in the plants.

The test tube extract is only the green coloring matter. It does not contain a heretofore unrecognized protein substance which is part of the chlorophyll in the plant. Without this second part, the test tube material is unable to duplicate the food-making work of leaves.

One proof the test tube chlorophyll is not the same as nature's is the fact when light shines upon it no oxygen is given off, as happens when light falls on plants.

London Getting Noisier

No Escape From Clamor Made By Modern Inventions

London seems to be getting noisier and noisier. Everyone consulted on the subject shares this view, and one of the scientists at the meetings of the British Association pointed out that the nation is beginning to demand protection against outrageous noise, whether generated by public or private bodies. There is no doubt about the demand; the response remains much less evident, and the science of sound insulation is still in its infancy in England. Floating floors and suspended ceilings are, in any case, still luxuries and exist chiefly in the imaginations of those house-agents who think they sound worth another £100 a year on the rent. So many modern inventions, radio, aeroplanes, motor cars, pneumatic drills, gramophones and so on, contribute to the general clamour, and even in the outlaying dormitory suburbs it is not always possible to escape all of them. In the more central parts of London noise is very nearly incessant.

First Angler: "I caught a fish so big that my friends wouldn't let me pull it aboard in case the boat was swamped."

Second Angler: "I quite believe you. I once had a similar experience on board the Queen Mary."

According to computations, 1,355 pounds of food are consumed during one year by each adult in the United States.

Longfellow wrote "The Hanging of the Crane" in 1867, for his fellow poet, Thomas B. Aldrich.

STOP Itching

TORTURE In A Minute

For quick relief from the itching of eczema, blotches, pimples, athlete's foot, scales, rashes and other skin eruptions, apply Dr. Dennis' pure, cooling, antiseptic, liquid D. D. D. PRESCRIPTION. Its gentle oils soothe the irritated skin. Clear, greaseless and stainless—dries fast. Stops the most intense itching instantly. A 35c trial bottle, at drug stores, proves it—or money back. Ask for D. D. D. PRESCRIPTION. 39

Art Treasures For Sale

Proceeds From Priceless Family Heirlooms Take Chinese Home To Fight

War has burst open China's treasure-chests, jealously guarded by tradition and by law. For years she has prevented her "household gods" from being transferred to alien hands for cash, states a writer in the London Daily Sketch.

But now exquisite jade carvings, beautiful tapestries, thousand-year-old vases are finding their way into English markets.

There are in London numbers of Chinese students. Many of them are very anxious to get home to China to take part in the struggle now going on. But often they cannot raise their passage-money.

Probably their parents are very rich—but it isn't possible to get money out of the country because of the general chaos.

And so they are taking the only possible way out—they are parting with priceless family heirlooms, brought with them as a tangible memory of home. Some of these students belong to the oldest, noblest families in China. British friends are helping them to dispose of their treasures by displaying a certain number and asking connoisseurs to "private views."

Miss Jessica Borthwick tells of a jade vase of the Ming period (about 1540) to which she is acting caretaker.

"This is very rare because it is hollow," she explains. "Jade is very seldom hollowed out—chiefly because it is so hard—only the Chinese have the secret of carving it. Old jade is harder than a diamond."

Miss Borthwick, who is an authority on art as well as on puppets (she is the moving power of the "Curved Mirror" puppet theatre), also shows a bamboo, paper-thin, exquisitely carved, in relief.

It is a 10th-century incense-burner of a cherry-red bloom, and when the incense smoulders in the holder at its base the smoke floats up the hollow bamboo and appears in delicate wraiths, shaped by the carvings of buddhas, horses, dogs and men through which it comes.

May Use "Q" Ships

Britain Has Already Designed Mysterious Anti-Aircraft Vessel

Determined to assert her rights along her "life-line" of Empire, Britain may resort to use of "Q" ships to end aerial attacks on British vessels in the Mediterranean.

This was revealed along with disclosure that admiralty experts already have designed an anti-aircraft "Q" ship—although its nature, plans and even its existence is a closely-guarded secret.

The mystery ship would be equipped with powerful anti-aircraft guns—concealed beneath wooden crates which would have the appearance of cargo on the decks.

The vessel also would carry a 250 m.p.h. pursuit aeroplane attached to a catapult and concealed beneath a tarpaulin.

The vessel, looking like an old tramp steamer, would cruise through the Mediterranean danger zones with concealed crews standing by its guns and a pilot sitting in the cockpit of the flying fighter, ready for action.

As soon as an attacking aeroplane flew low overhead, automatic slides would instantly uncover guns, a hail of bullets would shatter the air and the pursuit aeroplane would be catapulted into space to run down the attacking craft, should it escape anti-aircraft gunners.

The average Britisher can argue and work at the same time, says a Continental visitor. Business as usual during altercations.

Modern Poison Taster

Food Is Tested Chemically At Palace In Cairo

Tall, dignified Eric Titterington—known affectionately as "Titters"—recently arrived in London on short leave from Cairo. He is the modern counterpart of the medieval poison taster. Where olden time kings had their food tasted and tested for poison by someone before eating, the modern method in hot countries is chemical and analytical. Mr. Titterington has had years of experience as the official bacteriologist at the palace in Cairo. In a big Eastern palace there are hundreds of retainers to be fed. In his time Mr. Titterington computes that he has tasted enough milk to fill the Suez Canal, and enough bread to make a few more pyramids. "Fresh fruit is always the great danger," he told an English writer. "If you are served with a slice of melon in the East you may pick up any kind of disease, but the same melons exported whole to England with their rind unbroken are absolutely safe." Mr. Titterington has amusing tales to tell of palace life in Cairo. One—the story of the guest at the banquet who became so enamored of the gold plate that he decided to drop a gold fluted shell out of the window while no one was looking, go round and pick it up from the lawn afterwards. Unfortunately it fell on the head of a sentry and was promptly returned to the palace kitchen.

Small Balance Needed

Vancouver Church Must Be Debt Free Before New Bells Ring

Eight new bells will peal from St. James' Anglican church, Vancouver, Christmas morning—providing the church can raise $1,700 by that time to pay off the balance of its debt.

The bells, gift of Rev. R. G. Harker, a former rector of the parish, were given on the provision they remain mute until the balance of the debt on the building is paid off.

When the church opened last year, the debt was $12,500, but an unnamed friend in England promised if the congregation would raise the balance he would contribute $6,000.

So far, officials stated, $4,800 has been raised.

The bells, at present in Vancouver waiting to be hung, have an aggregate weight of 8½ tons.

A feather is one of nature's most wonderful mechanisms. The quill grows on the bird, the shaft grows on quill, the barbs grow on the shaft, the barbules grow on the barbs, and the barbicles grow on the barbules.

A beam of light shoots through space at a speed of 196,000 miles a second, or eight minutes in making the trip from the sun to the earth.

Little Helps For This Week

Behold I am with thee and will keep thee in all places withersoever thou goest. Genesis 38:15.

Why should you care and sadness borrow,
Why sit in nameless fear and sorrow,
God will mark out thy path tomorrow
In His best way.

The best place is wherever He puts us, and any other would be undesirable because it would be our choice and not God's. Do not think about distant events because the uneasiness about the future is unwholesome for you. We must leave to God all that depends on Him and think only of being faithful in all that depends on ourselves. When God takes away what he has given you, He knows well how to replace it either through other means or by Himself.

Just An Experiment

Idea Of Preacher Gave Carbonic Acid Drinks To World

Many billion bottles of pop and incalculable amounts of ice cream soda are now sold the year around because a Nonconformist preacher with a delight in chemical experiment found a crude means of introducing carbonic acid gas into still water more than a century ago. The great Dr. Joseph Priestly, whose mind, effervescing with the liberal ideology of the later eighteenth century, also persuaded well water to bubble like champagne and thus became, quite absent-mindedly, the great-grand-father of the soda fountain, itself about a century old.—New York Herald-Tribune.

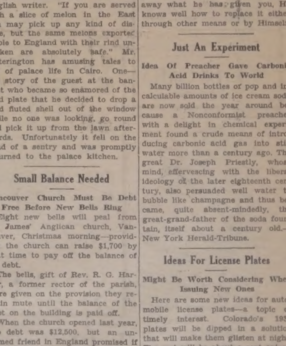

Ideas For License Plates

Might Be Worth Considering When Issuing New Ones

Here are some new ideas for automobile license plates—a topic of timely interest. Colorado's 1938 plates will be dipped in a solution that will make them glisten at night. The cost will be about a cent apiece. In Connecticut, drivers with a good record for five years are now given, at an extra cost of one dollar, a set of license plates bearing his or her initials. More than 8,000 have already been issued. Display of these plates marks the holder as a safe driver, and he must always be on good behavior to retain possession of them.—Toronto Star Weekly.

The wild cucumber develops its seeds on spring-like pods. When ripe, the springs curl up suddenly, shooting the seeds into the air.

Persons afflicted with aphema can think and write, but cannot speak.

THE MUNICIPAL CONVENTION

The 29th annual convention of the Alberta Association of Municipal Districts held in Edmonton last week was distinguished by the usual commonsense which marked the final passing of the resolutions brought before it.

The resolution on debt problems originally asked for cancellation of all fodder, seed grain, and relief advances, and was confined to farmers within the drouth area. This was amended to include all farmers in the province and the term adjustment substituted for cancellation, a much more equitable manner of dealing with the matter. The defeat of the crop insurance plan was, perhaps, only to be expected, as it covered too wide a field including, as it did, losses from hail, frost, wind, flood water, insects, etc., and it is possible the delegates were of the opinion the scheme would break down under the load of its financing. The resolution asking that the legislative assembly reconsider giving notice of the termination of the agreement with the R C.M P. was another wise feature.

But it would appear that the recommendations of the association receive scant attention from the present government, it being stated in the report that none had been answered, although members of the government, including the premier, had agreed that formal answers should be given.

Nor did the delegates receive much encouragement from cabinet ministers attending the convention. On the question of the government providing credit for the operation of the Hail Insurance Board, Hon. Solon E. Low, provincial treasurer, declared that further taxation was the only way money could be raised to continue the operation of the board, while Hon. William Aberhart was equally barren of any constructive proposals in his address, confining himself principally to a re hash of social credit theory, finally admitting "that the only way to get money was to borrow it, and that borrowing creates debt . . . . And where are we?" Well, Well! one could almost fancy these were the very tones of "Professor Orthodox Anonymous."

Russia's exports of wheat for the present are pretty well finished, as the Black Sea will soon be closed by reason of winter conditions.

Moved by I. Olsen, seconded by L. E. Larder, that the ice committee fix the north side of the rink. Carried.

Moved by I. Olsen that the season start off with a mixed bonspiel.

Moved that the meeting adjourn.

STOCK GRAZING IN SOUTH-EAST ALBERTA

The period of reduction in rentals for certain lands in south-eastern Alberta set aside for the purpose of stock-grazing, granted in the spring of 1935 to continue until December 31st, 1937, has been extended to December 31st, 1939, it was learned in an interview with the Hon. N. E. Tanner, Minister of Lands and Mines.

While there has been some improvement of late in stock grazing conditions, Mr. Tanner stated, it is apparent from investigations made that lands in the drought area are still unable to satisfactorily maintain the amount of stock per acre required by the regulations.

The original rental rate, inclusive of taxation, was 4 cents per acre or $6 40 per quarter section. While this rate still continues in more favorable localities, the less favorable ones will continue to be subject to the reduced rates of $5.20, $4.20 or $3.20 per quarter section, according to location.

Order-in Council authorizing this extension is dated Nov. 8, 1937.

Canadian National Railway Revenues

The gross revenues of the all-inclusive Canadian National Railways System for the week ending November 14, 1937, were $3,855,316, as compared with $3,713,069 for the corresponding period of 1936, an increase of $142,247.

VILLAGE OF DELIA

By-Law No. 87

NOTICE is hereby given that a Pound has been established on the property of Mr. Peter Nielsen, being Lot 12, Block 1, on the South side of 1st Avenue North, in the Village of Delia, as shown on Plan 545 AY, Highland, registered in the South Alberta Land Registration District.
